

Turning insight into savings with EquipmentIntelligence

EquipmentIntelligence empowers users to create and manage their own reports and perform in-depth analysis of real-time information directly within EquipmentRepair. IAS's reliable and secure web-based solution simplifies reporting of key information, allowing users to get answers quickly and easily.

Improve decision making with increased visibility

Let EquipmentIntelligence help you take your EquipmentRepair service to the next level by eliminating guesswork and accelerating fact-based decision-making. Users can analyze trends to reduce repair cycle turn times and increase equipment utilization, and vendor performance can be improved by the benchmarking of costs and turntimes. Data visibility offers a simple yet effective way for your decision makers to quickly understand, collaborate, and act on key business information. With the flexible design options you can easily create visual models in many forms, including:

- Dynamic charts and graphs
- Visual business analytics
- What-if analysis
- Presentations and publications

Easy to master, user-friendly interface

IAS EquipmentIntelligence is intuitive and

accessible from within the EquipmentRepair applications via a user's existing login details. Data is organized in a user-friendly manner allowing for drag-and-drop creation of list-based, tabular or chart reports on all pertinent data. Common fields of interest and applicable filters may be saved in order to reuse for later use or for other reports. Reporting is supported by a wide-range of output channels such as PDF, XML, HTML, CSV, DOC and TXT. IAS also provides support tools, documentation and training videos.

One platform for turning insight into action

Better insight relies on a clear understanding of the business drivers behind any report, or number. As an integral capability of the EquipmentRepair solutions, the EquipmentIntelligence module provides easy access to and understanding of the facts behind the numbers, so you can use just one solution to improve your global maintenance and repair (M&R) process.

Affordable

Without any hardware or software to buy, install or configure, EquipmentIntelligence provides the powerful yet affordable solution needed to address the diverse needs of business users.

Why EquipmentIntelligence?

- **Integrated and hosted business intelligence platform saves time and eliminates costs**
- **Ad hoc reporting accelerates fact-based decision-making and change management**
- **Control of data allows customization without IT staff, analysts or developers**
- **Trend analysis enables higher performing teams and vendors**
- **Intuitive interface makes training and utilization effortless**
- **Drill-down and sorting provides understanding of patterns and details**
- **Visual modeling simplifies collaboration and presentations**

Comprehensive business intelligence supporting EquipmentRepair

IAS EQUIPMENTINTELLIGENCE

Turn insight into savings with EquipmentIntelligence

Deliver comprehensive business intelligence from a single platform

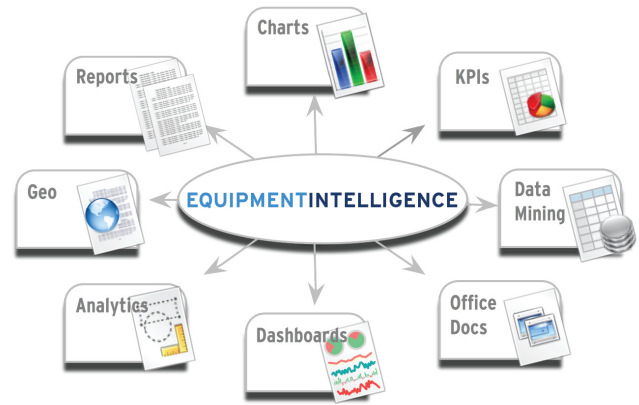

EquipmentIntelligence is a comprehensive business intelligence solution delivered via the web as an additional service to IAS EquipmentRepair. With EquipmentIntelligence, users can access their own data, how and when needed, to facilitate more effective response to real-time questions and format information to suit their needs with an intuitive drag-and-drop interface.

Deploy quickly for widespread availability to end-users

Because IAS EquipmentIntelligence is entirely web-based and integrated within EquipmentRepair, it can be deployed quickly and effortlessly to end-users. Once deployed, EquipmentIntelligence empowers users to build and share custom reports anytime they need questions answered, without waiting or relying on the IT department or costly investment.

Ad hoc reporting and analysis for managers

With EquipmentIntelligence, your decision makers can benefit from flexible ad hoc reporting, query, and analysis via their browser - without ever having to rely on IT. Using an intuitive web interface, business users can access complex data (presented in business-friendly terms), analyze it using simple point-and-click functionality, and format it to meet personalized requirements. EquipmentIntelligence users have considerable flexibility in how they access, format, and interact with their data online or offline.

About IAS

International Asset Systems (IAS) is the global leader in providing intermodal web-based applications and brokerage services. IAS connects equipment owners with their partners, vendors and operators of thousands of intermodal facilities worldwide to help them profit more by reducing equipment, transportation and operational costs, increasing booking fulfillment, and achieving greater asset visibility. The company's applications can be deployed quickly via the web, enabling clients to realize significant benefits immediately, while avoiding costly investments in technology and resources. IAS serves participants across the transport chain, including ocean carriers, 3PLs, NVOCCs, IMCs, equipment lessors, trucking companies, repair depots, railroads and terminals.
