

IAS Imbalance Management services enables ocean carriers, container lessors and NVOCCs to interchange equipment and buy and sell vessel space between areas where surpluses and deficits exist around the globe.

IAS InterChange boosts revenue and maximizes savings

IAS InterChange streamlines the equipment interchange process, significantly reducing container repositioning and lease costs for suppliers and receivers:

- Suppliers save money by improving container utilization, and balancing supply and demand; and
- Receivers increase profits by using equipment free of charge.

InterChange saves IAS clients millions of dollars each year, and a single one-way interchange can save both a receiver and supplier hundreds of dollars per container.

IAS slotXchange eases buying and selling of vessel space

IAS slotXchange enables ocean carriers and container lessors to manage their global equipment surpluses and deficits by matching empty containers with available 'slot space' on ocean-going vessels. With slotXchange, container owners retain control over their equipment and ensure that it is available for re-use as quickly as possible. Carriers with available slots can generate additional freight revenue of hundreds of dollars per TEU by filling empty vessel space.

What Imbalance Management solution is right for you?		
<b>I have containers I need moved</b>	Price is critical, timing less important	IAS InterChange
	Timing is critical, price less important	IAS slotXchange
<b>I need containers</b>	To move my cargo	IAS InterChange
	To fill my empty vessel space	IAS slotXchange

Connect to the world's largest one-way equipment network

### Why IAS Imbalance Management?

#### Features

- Track and manage interchange equipment on the web
- Find and sell available slot space
- Simplify the interchange process using a standardized agreement
- Centralize billing and settlement
- Leverage proven risk management guidelines
- Capture complete transaction details
- Receive free weekly slot availability summary

#### Benefits

- Save time managing equipment imbalances
- Reduce asset management costs
- Maximize asset utilization
- Reduce container repositioning costs
- Suppliers have access to more receivers, receivers to more suppliers
- Free use of interchange equipment
- Reduce container lease costs
- Increase revenue
- Fulfill customer equipment demand

# Rely on the world's largest one-way interchange and vessel slot space network

## Find more opportunities with expert brokers

IAS's team of experienced, multilingual brokers understand global and regional trade patterns and use exclusive web tools to track equipment surpluses and deficits and available inventory and slot space, around the globe. Constant updates from the industry's largest network of ocean carrier suppliers and receivers ensure that IAS brokers have current information to target the most optimal exchanges of equipment and vessel slot space. Because the information is readily available to IAS brokers all the time, you get more relevant matches quickly, allowing you to save more money.

## Increase asset utilization

When a container is repositioned by a receiver using IAS InterChange, it can be returned to the supplier quickly — often within the free days included with any exchange. During the process, IAS provides end-to-end transactional support to reduce the administrative burden and smooth the transition from on-hire to off-hire.

## View and manage your interchange transactions

IAS InterChange is the only equipment interchange service that offers visibility of your transactions with a convenient, web-based Software-as-a-Service (SaaS) solution. Once your interchanges have been confirmed by your IAS broker, the information is immediately available on the web, allowing you to manage your interchange information anytime, in real-time. Whether you want to view a summary of your open, pending and closed bookings or managing billing, IAS provides powerful and easy-to-use web tools that enable you to:

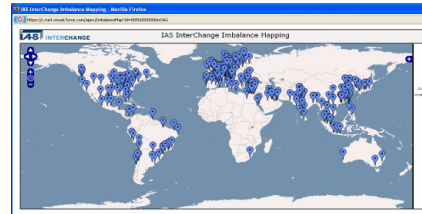

- View a summary of your transactions using a dashboard console
- Manage pipeline and billing with detailed reporting
- Create bookings and submit inquiries
- Request redeliveries
- Search for bookings and equipment

## Personal 24/7 support

IAS provides access to knowledgeable professionals around the clock to help you keep your business moving. If you have a booking or slot issue, or are looking for on-hire information or off-hire instructions, IAS representatives are available by phone or email to serve you worldwide.

## View your IAS InterChange transactions at a glance

Equipment interchange information is organized into convenient dashboards and reports. Frequent updates help to ensure you are always working with the most current information to enable the most compelling interchange matches worldwide.

## Receive weekly slot summary report

Each week, IAS publishes a report summarizing available slots for sale, and customers seeking slots to buy. Simply contact an IAS broker, and they will ensure that your request is viewed by over 200 clients worldwide.

Experienced brokers track global equipment imbalances on the web and can instantly identify meaningful interchange and slot opportunities worldwide.

## About IAS

International Asset Systems (IAS) is the global leader in providing intermodal web based applications and brokerage services. IAS's team of transportation professionals manage the world's largest intermodal information network, spanning thousands of operators and their trading partners including leading ocean carriers, 3PLs, NVOCCs, IMCs, equipment lessors, motor carriers, repair depots, and railroads. IAS helps clients reduce equipment, transportation and operational costs, increase booking fulfillment, and achieve greater transport visibility. The company's suite of on-demand Software-as-a-Service applications can be operated as turnkey solutions accessible on the web or as integrated extensions of a client's transportation management system. Each application is based on industry best practices and can be implemented quickly, enabling clients to realize significant benefits immediately, while avoiding costly investments in technology and resources.
