

Leverage world class technology and services at a fraction of the cost

Avoid system start-up, administrative, and ongoing costs

IAS provides its business applications as SaaS (Software-as-a-Service) solutions accessible using the web. This approach enables on-demand access to software services with significant economic, technical and operational advantages — there is no software to purchase, install, manage or maintain, and the requirements of your IT resources is minimal. IAS manages all day-to-day operations as a turnkey solution, including support and maintenance of the entire technical infrastructure. Plus, IAS services can be accessed via a standard web-browser anywhere at any time, eliminating the cost and complexity of maintaining a current version of an application across your network.

Worry-free operation

IAS SaaS solutions provide you with full protection from the worries of technology change and burden of routine maintenance. IAS regularly backs up data, monitors software patches and upgrades from third party software providers, and applies upgrades as required, at no additional charge. Service updates are seamless, with no impact to your business. With more than a decade of experience building a leading portfolio of intermodal on-demand software solutions, IAS has the network, applications and technological infrastructure needed to operate continuously and process millions of intermodal events serving thousands of users worldwide.

Superior reliability

IAS SaaS solutions are supported by a sophisticated, multi-tenant, web-based architecture optimized to meet the demands of enterprise-strength, message-based technology services. IAS uses industry proven hardware and software products such as Sun Microsystems® servers and Oracle® database tools. IAS SaaS solutions are delivered through a leading data center service provider that meets rigorous Tier-3 technology infrastructure standards†, featuring a wide range of redundant system measures that ensures system availability for you and your intermodal partners around the clock.

IAS provides technology infrastructure that delivers clients guaranteed, high quality service:

- 99.9% Service availability
- Standard web browser access from any computer, anywhere
- 'Best-of-breed' hardware and software components

Connect to IAS SaaS solutions anywhere, using a standard web browser

Leverage world class technology and services at a fraction of the cost

Performance Guarantee

IAS SaaS solutions are backed by one of the transportation industry's leading and most comprehensive service guarantees. All software and service delivery systems will achieve at least 99.9% availability each month, and IAS will provide timely response and resolution to reported issues.

IAS Hub Infrastructure

IAS services are built upon the IAS Hub, a sophisticated, multi-tenant, web-based platform whose architecture is designed to meet the demands of IAS' enterprise-strength intermodal applications. The IAS Hub is comprised of proven, robust technology components:

Component	Technology
Hardware Servers	HP Intel Server
Routers	Cisco
Load Balancer	Citrix
SAN	HP Storageworks
Operating System	Red Hat Enterprise Linux
Web Server	Apache
Application Server	Oracle Weblogic
Database Server	Oracle
Integration Server	Software AG WebMethods
Report Server	Jaspersoft BI Server
Object Relational Mapping	Hibernate
Rules Server	IBM ILOG JRules

The IAS Hub and associated applications are delivered through a leading data center provider that meets rigorous Tier 3 technology infrastructure standards, featuring multiple connections to the internet backbone, redundant hardware, systems and power supplies, and robust physical and logical security to ensure maximum availability and reliability for IAS users. The IAS Hub has processed over 45 million intermodal transport events.

About IAS

International Asset Systems (IAS) is the global leader in providing intermodal web-based applications and brokerage services. IAS's team of transportation professionals manage the world's largest intermodal information network, spanning thousands of operators and their trading partners including leading ocean carriers, 3PLs, NVOCCs, IMCs, equipment lessors, motor carriers, repair depots, and railroads. IAS helps clients profit more by reducing equipment, transportation and operational costs, increasing booking fulfillment, and achieving greater transport visibility. The company's suite of on-demand Software-as-a-Service applications can be operated as turnkey solutions accessible on the web or as integrated extensions of a client's transportation management system. Each application is based on industry best practices and can be implemented quickly, enabling clients to realize significant benefits immediately, while avoiding costly investments in technology and resources.
