

Manage global equipment imbalances

Easily buy and sell vessel space

IAS slotXchange enables ocean carriers and container lessors to manage their global equipment surpluses and deficits by matching empty containers with available 'slot space' on ocean-going vessels. With slotXchange, container owners retain control over their equipment and ensure that it is available for re-use as quickly as possible. Carriers with available slots can generate additional freight revenue of hundreds of dollars per TEU by filling empty vessel space.

Improve asset utilization

Finding available vessel space for your containers, or containers to fill your empty vessel slots, can be difficult and time-consuming. IAS makes the process simple and easy with experienced brokers who have connections with ocean carriers worldwide, and are aware of the available inventory and slot space. Not only can brokers identify opportunities for you, but they will work hard to ensure that you receive the best possible rate as well.

Receive weekly

slot summary report

Each week, IAS publishes a report summarizing available slots for sale, and customers seeking slots to buy. Simply contact an IAS broker, and they will ensure that your request is viewed by over 200 clients worldwide.

About IAS

International Asset Systems (IAS) is the global leader in providing intermodal web based applications and brokerage services. IAS's team of transportation professionals manage the world's largest intermodal information network, spanning thousands of operators and their trading partners including leading ocean carriers, 3PLs, NVOCCs, IMCs, equipment lessors, motor carriers, repair depots, and railroads. IAS helps clients profit more by reducing equipment, transportation and operational costs, increasing booking fulfillment, and achieving greater transport visibility. The company's suite of on-demand Software-as-a-Service applications can be operated as turnkey solutions accessible on the web or as integrated extensions of a client's transportation management system. Each application is based on industry best practices and can be implemented quickly, enabling clients to realize significant benefits immediately, while avoiding costly investments in technology and resources.
